Experience

- Josh Technology Group** Gurugram, India
Senior Frontend Developer Oct 2024 – Present
 - Led **LINQ FDP (midday meal management system)** user interface reskin: scoped 5,500+ hours work breakdown structure (WBS), directed a 5-member frontend team, and ran technical design reviews; ahead-of-schedule delivery secured follow-on contracts and boosted company revenue.
 - Architected advanced **POD Examination and Question Paper Templates** with 4-level nested React Hook Forms; optimized through Contexts and Callbacks (instead of watchers), enabling AI-based question auto-generation and improving faculty efficiency by 60%.
 - Redesigned **Razorpay integration** (RBI-compliant), owning requirements, stakeholder discussions, coding, and validation — delivered on time with zero defects.
 - Developed **Assessment Module** on POD, enabling scheduling, collaboration, and student test-taking; implemented reusable React components with deep validation (React Hook Form + Yup).
 - Revamped corporate website (700+ hour project), owning architecture, reusable component design, and CI/CD pipelines; achieved 30% faster load time and a higher Lighthouse SEO score.
 - Enhanced **Classroom** with group/session workflows and AI-driven assignments; engineered scalable dashboards with lazy-loaded charts and paginated card lists over large datasets — reduced render latency by 40%.
 - Refactored reusable components (TreeView, MultiSelect), cutting recurring bugs by 35% and strengthening product robustness.
 - Integrated accessibility (WCAG 2.1), responsive design, and cross-browser testing across POD modules to ensure inclusive UX.
 - Applied Agile/Scrum practices (sprint planning, retrospectives, backlog grooming); reviewed PRs and mentored 5 junior engineers.
- Josh Technology Group** Gurugram, India
Frontend Developer Engineer (Full-time and Internship) Jan 2023 – Oct 2024
 - Developed high-complexity **Certificate Module** with customizable, QR-enabled, digitally signed certificates; architected multi-step React forms with advanced validation, and created Jinja-based reusable templates supporting 80+ certificate themes.
 - Contributed to **Classroom** feature development: implemented group management, session handling, and AI-driven test/assignment workflows.
 - Built scalable dashboards with optimized charts and paginated lists for large datasets, ensuring smooth rendering performance.
 - Implemented **Hackathon** module enhancements (Alumni and Teams support), streamlining collaboration workflows for 10,000+ student participants.
 - Developed SEO-optimized public-facing **POD microsite** using Next.js, improving organic reach by 45%.
 - Collaborated with backend and design for reliable REST API integration, UX alignment, and accessibility compliance.

Projects

- Secured Identity Storage DApp** Aug 2022 – Sept 2022
Major Project
 - Built decentralized application for secure identity storage using React, Material-UI, Hardhat, and Solidity.

Technical Skills

- React.js, JavaScript (ES6+), TypeScript, Redux, Next.js, HTML5, CSS3, Material-UI, Jinja, Node.js, REST APIs, Git, GitLab CI/CD, Webpack, Vite, Jest, React Testing Library, Google Cloud

Education

- Galgotias University** Aug 2019 – May 2023
B.Tech in Computer Science, CGPA: 9.23/10 (Silver Medalist) Greater Noida, India
